

## Aqua Blue Boulders

### **Description:**

Aqua Blue Boulders are a great addition to any water feature or garden. The deep blue color of these Gneiss Granite Boulders add a richness of color to a waterscape that no other stone can approach. They are streaked with faint white veining and some occasional rust. Shapes vary and will include jagged or rounded edges.

### **Characteristics:**

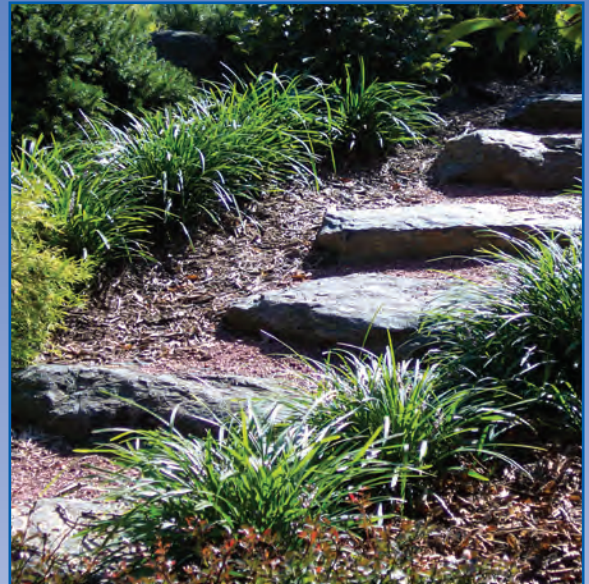

Size: 12" to 18"

18" to 24"

24" to 36"

Color: Deep blue with some white and rust brown streaking

Packaged: Palletized or bulk

### **Complimentary Stone:**

These boulders compliment granite boulders in streams and ponds. They go equally well with 1"-4" Local Wash and River Boulders in the same setting. Aqua Blue Boulders also make a great accent piece by themselves or in small groupings in garden beds.
