

Cut Stone Steps provide a sense of calm and stability to landscape designs. And, of course, you can count on their durability.

A variety of steps are available for any application:

- Natural cleft tops for a more natural appearance.
- Rough sawn sandstone for a casual, yet neat look.
- Sawn and sandblasted steps provide the cleanest look, but will develop a patina with age.

Not all step materials are available in each finish and some may only be available in one finish. See product sheet for finish options. Cut stone steps may be purchased individually.

Natural Stone Steps are the best value: great looking and low cost. 4' steps weigh 400 lbs. and 6' steps weigh 600 lbs.

**Remember to refer to the building code requirements in your community for any regulations pertinent to outdoor steps.**
