

DIMENSIONAL STONE

Lang Stone Is Your Best Choice for Cut Limestone

Lang Stone provides quality limestone or sandstone suitable for any residential or commercial project.

Whether your plans call for custom design-build project, intricate carving from a master craftsman, or immediate delivery of standard stone accents, Lang Stone delivers with skill and accuracy.

Renowned for its durability and beauty, limestone adds character and permanence to any project.

The Skill to Create Reproductions or New Designs

Its remarkable uniformity in composition, ease of shaping, consistent color and weather resistance have made it the premier building material for centuries.

From initial concepts to final fabrication, Lang Stone provides all the services necessary to create memorable pieces of cut limestone.

Lang Stone has particular expertise at providing limestone for restorations and expansions of historic buildings. Our experts carefully authenticate every cut to assure flawless continuity.

Whether creating elaborate reproductions or a new design, all hand carving is done by skilled craftsmen, artfully wielding air chisels.

Immediate Delivery

Lang Stone stocks an expanded inventory of limestone detailing products - so you can get same day or next delivery for standard sizes.

When your plans call for stone accents, Lang can provide you with address stones, keystones, pier caps, split pier caps, bullnose sills, rockface sills and other fabricated products.

Of course, our skilled stone craftsmen can also fabricate all the stock items to your exact specifications.

The Premier Building Stone

Because limestone is a freestone, it can be cut and carved into an endless number of sizes and shapes. Lang Stone's skilled craftsmen can plane it, turn it on a lathe, saw it, and hand carve it to meet any design specifications.

Dimensional Limestone can be used to fabricate any architectural element. Its light color and uniform texture blend seamlessly with other construction materials, making it an excellent choice for trim pieces and accents.

Note: Natural stone products are likely to show variations in structure, veining, color, and thickness. Photographs provided are to be considered an approximate representation of the product rather than an exact representation of the product which will be provided.
