

Ohio Blue Sandstone

Description:

Ohio Blue Sandstone is a fine-grained sandstone from the Scioto Formation in Southern Ohio. It's tight grain structure and clean appearance distinguishes it from other fabricated sandstones. There are two colors of this stone: Buff (a yellowish brown) and Blue (a grayish blue). Ohio Sandstone is easily carved for custom detailing and keeps a crisp detail edge.

Characteristics:

Compressive Strength: 15,900 psi

Modulus of Rupture: 3,500 psi

Absorption: 0.2%

Bulk Specific Gravity: 2.24

Density: 140 lbs/cubic ft.

Note: Physical properties are provided for general comparisons. For specific applications and design engineering please contact your Lang Sales Representative for current ASTM testing data.

Applications:

Ohio Blue Sandstone is often used for building detailing such as sills, lintels, quoins and coping. Columns and similar structural components are possible if the limitations of block size are factored in.
