

Lang Stone is Your Best Choice for Granite

Lang Stone has a large variety of beautiful granites to choose from. The use of granite can look great with any décor or color scheme. Its' practicality and durability makes granite a smart choice over almost any other material. Lang Stone stocks many different types of granite. Since we deal with different suppliers in the Columbus area, you are not just limited to what Lang Stone has in stock. There are endless possibilities that you can choose from with the color, edge profile, and finish to make your job truly your own!

Granite Uses

The uses of granite are almost endless. Kitchen counter tops are the most typical places to use granite but certainly not the only place granite can be used. Fireplace surrounds and hearths are a great use of granite due to its' high heat tolerance. Granite bathroom vanities, shower seats and tub surrounds are also very practical places to use granite. Outdoor patio tabletops, coffee table tops, bar tops and conference or desktops are also beautiful in granite. As you can see, the possibilities are only limited to your imagination with the use of granite.

Measuring and Installation Process

We have the best measuring and install crews in the business. To get started all you have to do is provide us with a rough sketch of the area you want quoted with the approximate dimensions. We will go over all the options with you and provide a quote. After you accept the quote and payment is discussed, we will send out one of our skilled measuring staff to get the fabrication measurement of your granite top. We use a digital measuring device to get the exact dimensions of the area being measured. You would be required to have your new sink, faucet, cook top, etc... on site prior to the measurement so we can figure out the exact cut out sizes needed as well. We then bring the information we gather back to our shop and begin fabrication of your stone. You also have the option of viewing the actual slabs that you will be getting prior to the fabrication. Generally 2 weeks after your measure date our install crew will come out to install your new granite tops!

Granite Information

Granite is quarried from all over the world and comes in many different colors and finishes. The polishing of the face of the slabs is done primarily at the quarry but there are a few changes that can be made here at our shop. Granite can come in honed, brushed, and flamed finishes, just to name a few. We offer many different edge profiles as well. The size of the slab varies and different thickness is also available. Most of the granite we stock comes in 3cm thickness (1 1/4" thick).
