

GRANITE

Sapphire Blue

Country of Origin:

India

Description:

The name of this granite is somewhat deceptive. The dark black background gives way to large brown chips of mica that push to the surface. What gives the stone its character are the hints of clear quartz that cast a shade of blue.

Characteristics:

Compressive Strength: 27,025.60

Flexural Strength: 2,702.56

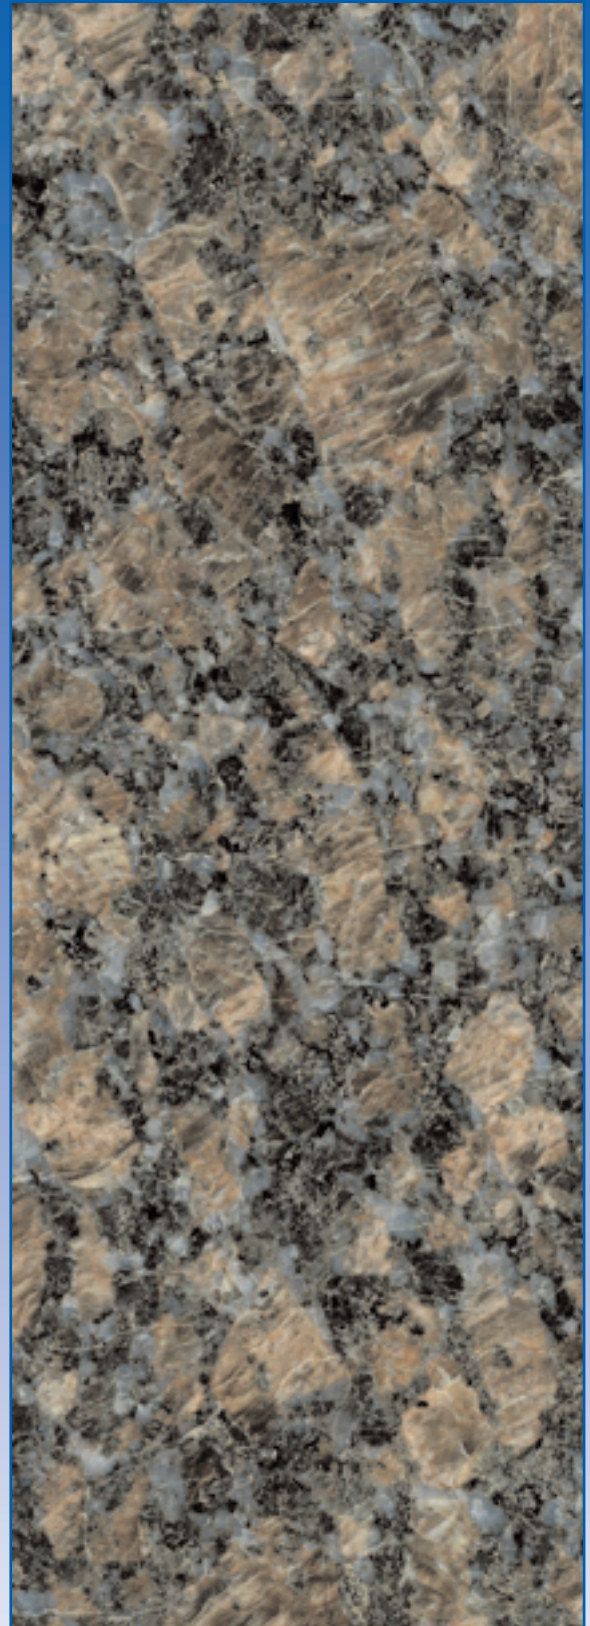

Absorption: .21

Density: 168.56

Note: Physical properties are provided for general comparisons. For specific applications and design engineering please contact your Lang Sales Representative for current ASTM testing data.

Applications:

Sapphire Blue is used for a wide range of architectural details, but most commonly for countertops and pedestrian surfaces. This granite is typically available in 3 cm or 1-1/8" thickness for use on kitchen and bath counter surfaces as well as paneled walls such as shower stalls. It is also available in 1 cm or 3/8" thick, 12" x 12" tiles for both floor and wall applications. Other sizes may be purchased based on availability.
