

Granite Boulders

Description:

Available in a variety of sizes, these boulders fill many design needs in the landscape. While generally rounded, some boulders will have freshly broken faces, revealing dramatic veining and colors. They are commonly found in garden ponds and streams. They are also popular as address stones, with residential street numbers etched into them. The small boulders can also be used as a veneer stone.

Characteristics:

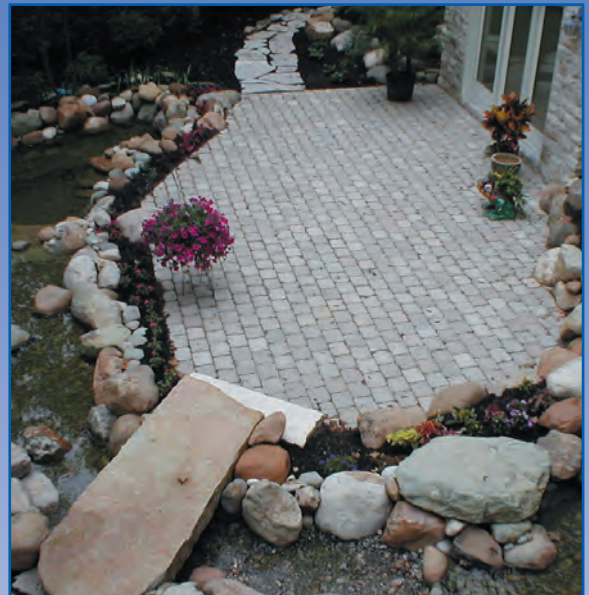

Typical Size Groupings:

- 5" to 8" (Palletized)
- 10" to 15" (Palletized)
- 12" to 24" (Bulk)
- 24" to 36" (Bulk)
- 36" and larger (Bulk)

Type: Granite

Complimentary Stone:

When used in a pond or dry stream, Local Wash Gravel makes an excellent ground plane material. If selected by color, they can easily be tied into a design that includes Sycamore® Blue Thin or Ohio Gold Thin.
