

## Granite Boulders

### Description:

Available in a variety of sizes, these boulders fill many design needs in the landscape. While generally rounded, some boulders will have freshly broken faces, revealing dramatic veining and a large variety of colors. They are commonly found in garden ponds and streams. They are also popular as an address stone, with residential street numbers etched into them. The small boulders can also be used as a veneer stone.

### Characteristics:

#### Three Size Grades:

4" - 8" (Baseball to softball)

8" - 12" (Softball to basketball)

12" plus (Basketball to table)
