

RANDOM VENEER STONE

Granite Boulders

Ohio Top Rock

Split Granite Boulders

This is a 'catch-all' category that includes stone that is sorted, but not mechanically split such as Webb Wall and Top Rock. Webb Wall is characterized by random size and shaped stone, larger in area than a Split Veneer with the natural cleft showing. Top Rock is a stone that has been collected in field and woods, most often literally right off the top of the ground.

Note: Natural stone products are likely to show variations in structure, veining, color, and thickness. Photographs provided are to be considered an approximate representation of the product rather than an exact representation of the product which will be provided.
