

WALLSTONE

Ottawa[®] Shadow Wall Thin

Description:

For low garden walls, nothing provides a more layered look than the Ottawa[®] Shadow Wall. This stone stacks easily and is easy to work with. The most distinguishing feature of this stone is its thinness, which yields a very layered look to the finished wall. The buff color against a dark mulch bed or a grouping of evergreen shrubs is very striking.

Characteristics:

Thickness: 1" to 3"

Color: Light to medium buff color

Coverage: 18 sf/ton

Type: Limestone

Packaged: Palletized
