

WALLSTONE

Sandstone Cut Dry Wall Sawn Height

Description:

A heavy grained sandstone, the Sandstone Cut Dry Wall (the same product as Briar Hill and Wheatfield) is an easily stacked stone that delivers a classic stone wall in a short amount of time. The sawn bed height gives it a uniform thickness that stacks up like building blocks. The stone itself is easy to work with using a hammer and chisel to cut pieces and shape them. The sandstone also supports plant growth, freely enabling mosses and lichens to grow giving the stonework an aged quality. Sandstone Cut Dry Wall is a Lang exclusive.

Characteristics:

Flat, irregular shaped stone, suitable for stacking

Thickness: Sawn bed height, 3" or 6"

Sizes: Split at 8" depth, random lengths (typically 28" - 32")

Color: Full range of tans, browns, some red and burgundy

Coverage: 23 - 25 sf/ton

Type: Sandstone

Packaged: Palletized
